

Holy Spirit High School
Math 2201 Chapter 5 Statistical Reasoning Test

Name: _____

Formulas Provided
$\sigma = \sqrt{\frac{\sum (x - \bar{x})^2}{n}}$
$z = \frac{x - \mu}{\sigma}$

Part 1: Multiple Choice (10 marks)

Identify the choice that best completes the statement or answers the question.

1. Which data set has the greatest range? 1. _____
- A. 13, 4, 23, 7, 9
 - B. 36, 45, 56, 22, 49
 - C. 4, 4, 4, 4, 4
 - D. 82, 85, 72, 94, 86

2. A bank teller would like to determine the dispersion among the withdrawals at the ATM. Which measures would she use to determine this dispersion? 2. _____
- A. mean and mode
 - B. mode and median
 - C. mean and range
 - D. range and standard deviation

3. A set of data has a mean of 132 and a standard deviation of 14.8. If each data value in the set decreases by 5, what is the new mean and standard deviation? 3. _____
- A. $\mu=127, \sigma = 9.8$
 - B. $\mu=127, \sigma = 14.8$
 - C. $\mu=132, \sigma = 9.8$
 - D. $\mu=132, \sigma = 14.8$

4. Which statement is true based on the graph?
- A. Graphs A and B have the same standard deviation
 - B. Graphs B and C have the same mean
 - C. Graphs A and C have the same standard deviation
 - D. Graphs A and C have the same mean

5. A set of data is normally distributed. What percent of the data is within three standard deviation of the mean? 5. _____
- A. 2.5%
 - B. 68%
 - C. 95%
 - D. 99.7%

6. The ages of participants in a curling bonspiel are normally distributed, with a mean of 40 and a standard deviation of 10 years. What percent of the curlers are between 20 and 30? 6. _____
- A. 2.35%
 - B. 13.5%
 - C. 50%
 - D. 68%

7. Which set is normally distributed? 7. _____
- A. Set A
 - B. Set B
 - C. Set C
 - D. Set D

Interval	0-9	10-19	20-29	30-39	40-49	50-59
Set A.	2	5	7	10	15	15
Set B.	5	5	4	5	5	0
Set C.	1	5	9	10	4	1
Set D.	8	9	3	11	8	14

Math 2201 Chapter 5 Statistical Reasoning Test

8. Which description does not describe the normal curve? 8. _____
- A. starts off increasing
 - B. symmetrical
 - C. shaped like a bell
 - D. always increasing
9. A set of data is normally distributed with a mean of 184 and a standard deviation of 5. What is the z-score for a value of 196? 9. _____
- A. -2.40
 - B. -0.9918
 - C. 0.9918
 - D. 2.40
10. Quality control wants to replace fewer than 2.56% of the game consoles it produces. What is his corresponding z-score? 10. _____
- A. -1.95
 - B. -0.9948
 - C. 0.9948
 - D. 1.95

Part 2: Short Answer (22 marks)

Show ALL necessary workings in the space provided.

11. The histogram below shows the scores (out of 100) students received on a psychology final exam.

- a) How many students wrote the exam? (1 mark) _____
- b) Into which interval would a score of 80 be placed? (1 mark) _____
- c) How many students scored greater than 70? (1 mark) _____
- c) Construct a frequency polygon. (2 marks)
- d) Is the data normally distributed? Explain how you know. (2 marks)

Math 2201 Chapter 5 Statistical Reasoning Test

12. The hours of 5 different employees at two local fast food restaurants are given below.

- a) Calculate standard deviation for the hours for both companies below. (6 marks)
- | | |
|--------------------|--------------------|
| Monster Burgers | Super Chicken |
| 26, 34, 45, 10, 30 | 13, 15, 34, 16, 22 |

- b) Max has a car loan and wants to work consistent hours to ensure he can cover his payments, to which company would you recommend that he apply and explain why. (1 mark)

13. The average life expectancy of a certain breed of cat was determined to be 11.4 years with a standard deviation of 1.6 years.

- a) Draw a normal distribution curve that represents this information. (2 marks)

- b) What is the probability that a given cat will live less than 9.8 years? (1 mark)

- c) What is the probability that a given cat will live more than 9.8 years? (1 mark)

- d) What is the probability that a cat will live less than 8 years? (1.5 marks)

- e) What is the probability that a cat will live between 8 and 10 years? (2.5 marks)
